

CHEQUERED PLATES

The AM/NS India Steel chequered plates are high friction plates that ensure maximum skid resistance. Available in tear drop pattern with a maximum bead height of 1.2mm, they give products an added advantage.

BENEFITS

- Wide range of thicknesses and widths, less joints
- Bright clean surface
- High skid resistance due to higher friction
- Consistency of properties
- Can be supplied in shot blasted condition

APPLICATIONS

- Industrial flooring
- Grating over closed gutter / culvert
- Structural applications

DIMENSIONS

- Thickness: 3-10 mm
- Widths: 900-1,500 mm
- Length: Up to 12,500 mm

SUPPLY CONDITION

- Chequered Pattern: Tear drop as 1A of IS 3502
- Our Chequered plates are available in ASTM A786, with base hot rolled coil, sheet, and plate in line with ASTM A36 grade.
- Shapes: Asymmetrical C-shapes, T-shapes, Z-shapes, symmetrical hybrid, camber, variable depth, and tapered
