

TRAPEZOIDAL BLANKS

Our Trapezoidal plates are designed to be cleaner and more efficient, reducing material wastage. These plates simplify procurement for the end-user by meeting their specific requirements and help reduce their operational costs.

BENEFITS

- No additional blanking operation required
- Increases productivity
- Reduces steel wastage

APPLICATIONS

- Auto components like car doors, panels, brackets, crash members etc.
- Large static electrical equipment

DIMENSIONAL

- Thickness: 2 mm max
- Width: 1,800 mm max
- Length: 6,000 mm max
- Corner angle: 50°
